

MESON Container Overview

MESON Technology

[mee-zon] [tek-nol-uh-jee]

noun

Clear, insulated cup, bowl, and container technology conceived to deliver an innovative, reusable, and sustainable packaging solution for extending, preserving, and maintaining insulation properties and shelf life.

The Facts

Structure | This superior insulated container is made possible by unique, scalable double-walled air gap technology.

Clarity | The future is clear! Now you can offer a clear, insulated container that enhances product presentation and performance.

Branding | Industry-leading 3D branding with fingertip tactility promotes and can increase brand awareness, creating a new level of brand interaction with users. Additional branding options include printing on the outside surface or a label in the air gap – both available with or without 3D features.

Insulation | Insulated container ensures user's hand stays warm and contents stay hot/cold – minimal, if any, transfer of body heat from user's hand into contents.

Recyclable | 100% recyclable & sustainable.

Reusable | The container's superior performance and optional sealed air gap promote wash and reuse - such as a storage container for meal leftovers.

Repurposable | Container can be repurposed into as many items as the user can imagine – such as a pot for a plant, pencil holder, spare change jar, and more.
